

XELPROS™ (latanoprost ophthalmic emulsion) 0.005% is available exclusively through the XELPROS Xpress™ program that sends XELPROS directly to you

What you can expect

1. Our pharmacy partner will call

You will get a call from CapstanRx Pharmacy or Transition Pharmacy within 1 business day after they have received your prescription. You cannot get your XELPROS prescription without talking to the pharmacy first, so it is important to connect (see pharmacy contact information below).

2. Share your information

You will be asked to verify your mailing address and payment method (credit card or check) by phone.

XELPROS offers consistent 12-month pricing for all patients - regardless of insurance coverage

- 1-month supply for \$60*
- 3-month supply for \$115†
- XELPROS purchases cannot be counted toward a Medicare Part D deductible‡

No coupons are permitted for XELPROS, and XELPROS is not available through retail pharmacies.

3. Receive your prescription in the mail

Our pharmacy partner will provide you with a tracking number, and your prescription will be delivered to your home in 3 to 5 business days or sooner.

- Your signature is not required
- XELPROS does not require refrigeration¹

Your physician has sent your prescription to one of the following pharmacies. Be sure to ask your physician which pharmacy they selected

CapstanRx Pharmacy[§]

1771 International Pkwy #121, Richardson, TX 75081
Hours: Mon-Fri, 9:00 AM-6:00 PM CST
NCP DP: 5925891
Phone: 855-651-8360
Fax: 972-674-1456

If you order your prescription through CapstanRx Pharmacy, they will call you from the phone number above.

Transition Pharmacy

2546 Metropolitan Dr, Feasterville-Trevese, PA 19053
Hours: Mon-Fri, 9:00 AM-8:00 PM; Sat, 9:00 AM-1:00 PM EST
NCP DP: 3989603
Phone: 844-364-7670
Fax: 866-694-2555

If you order your prescription through Transition Pharmacy, they will call you from a 215 area code (Pennsylvania).

For healthcare professionals:

1. Prescribe

Prescribe XELPROS for your patient and submit the prescription to either CapstanRx Pharmacy or Transition Pharmacy, via e-prescribing, fax, or phone.

2. Prepare

Tell your patient that they will receive a call from the pharmacy you selected within 24 hours.

The pharmacy will ask for your patient's mailing address and credit card information.

3. Receive

The pharmacy will provide a tracking number, and your patient will receive their prescription in 3 to 5 business days or sooner.

Remember:

- Patient signature is not required
- XELPROS does not require refrigeration¹
- Remind your Medicare Part D patients that payments do not count toward their Medicare deductible[‡]

^{*1} month = 1 bottle.

[†]You must buy a 3-month supply (3 bottles) of XELPROS during a single purchase to receive it at this reduced price.

[‡]In the event you elect the cash price for a covered drug during the benefit year (opt in), you agree to pay the cash price throughout the coverage year. The terms and conditions of this arrangement do not allow participants to submit any claim for reimbursement for the product purchased by any third-party Commercial payer, including Federal or State healthcare programs, nor include the amounts paid for the product in any submission for true out-of-pocket expenses calculations under a prescription drug plan.

[§]CapstanRx Pharmacy is not available in the state of Montana.

INDICATIONS AND USAGE

XELPROS™ is a prescription medication for the treatment of high eye pressure (known as intraocular pressure, or IOP) in people with open-angle glaucoma or ocular hypertension.

IMPORTANT SAFETY INFORMATION

XELPROS is not recommended in patients with a known hypersensitivity to latanoprost, or any other ingredients in this product.

Some patients may experience darkening of the eye color, darkening of the eyelid and eyelashes, and increased growth and thickness of eyelashes while taking XELPROS. This darkening effect may increase as long as XELPROS is administered, and eye color changes are likely to be permanent. The increased growth and thickening of the eyelashes are reversible when XELPROS is discontinued.

Patients should avoid touching the tip of the dispensing container to the eye or surrounding areas during administration because this could cause the tip to become contaminated by common bacteria known to cause eye infections. Serious damage to the eye and subsequent loss of vision may result from using a contaminated product.

Contact lenses should be removed prior to the administration of XELPROS. Contact lenses can be reinserted 15 minutes following administration.

If more than one topical eye medication is used, the drugs should be administered at least 5 minutes apart.

The most common side effects of XELPROS may include eye pain/stinging, eye redness, eye discharge, growth of eyelashes, and eyelash thickening.

Patients who have eye surgery, develop an eye condition, or any other reaction while taking XELPROS should consult their eye doctor concerning the continued use of this product.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.
